

Micro-Technology

Torque range from
0.1 to 6.0 Nm

DR. TORQUE®

Special torque adapter,
connecting and driving shapes
are available on request.

Applications

Whether you manufacture high-value consumer goods or delicate electronics, the specification of the micro-technology torque range has been carefully created to satisfy your commercial needs. It optimizes assembly of low torque applications: watches, smart phones, cameras, glasses, jewelry, drone and other electronics products.

Camera Lens

Drone

Glasses
